Subject: Proposed settlement

DOJ,

I think this proposed settlement does nothing but further the Microsoft Monopoly, is not a severe punishment, and seriously hurts competitors such as Apple. Do not accept it, this is the actions of a monopoly trying to further its dominance while trying to seem like a nice guy. Talk about a sweat deal! Do not be fooled. It will make the US government look foolish and will be a waste of everyone's taxpayer money, after having spent all this time and money proving that they are the monopolists they are. It is like letting a murder choose to be punished by hitting him with a soft pillow and then giving him the pillow to sleep on.
